"SIAH-1 interacts with alpha-tubulin and degrades the kinesin kid by the proteasone pathway duving mitosis.";
The proteasone pathway duving mitosis and meiosis. Binds to the movements of chromosomes during mitosis and meiosis. Binds to microtubules and to DNN Nuclear.

-I- FUNCTION: Kinesin Mediated by SIAH1 and leading to its subsequent proteasonal degradation (Probable).

-I- SUBCELLULAR LOCATION: Mediation (Probable).

-I- SUMILARITY: Belongs to the kinesin-like protein family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Gaps
